

Building work, replacements and repairs to your home

Read this before starting any work

Many jobs in the home need to be notified to and approved by your Local Authority Building Control unless carried out by an installer who is registered with a **Competent Person Scheme**. Some examples are shown below.

What will happen if I do not comply with the Building Regulations?

- If you do not comply the work will not be legal. You could be prosecuted and could face a fine of up to £5000.
- The work may not be safe or could cause health problems. It may also not meet energy efficiency standards.
- If work is found to be faulty your Local Authority could insist you put it right at your own expense.
- If the work has not been notified or carried out by a registered installer from a Competent Person Scheme you will have no record that the work complies with Building Regulations. This will be important when you come to sell your home as you will be asked to provide certificates of compliance with the Building Regulations as part of the Home Information Pack (HIP).

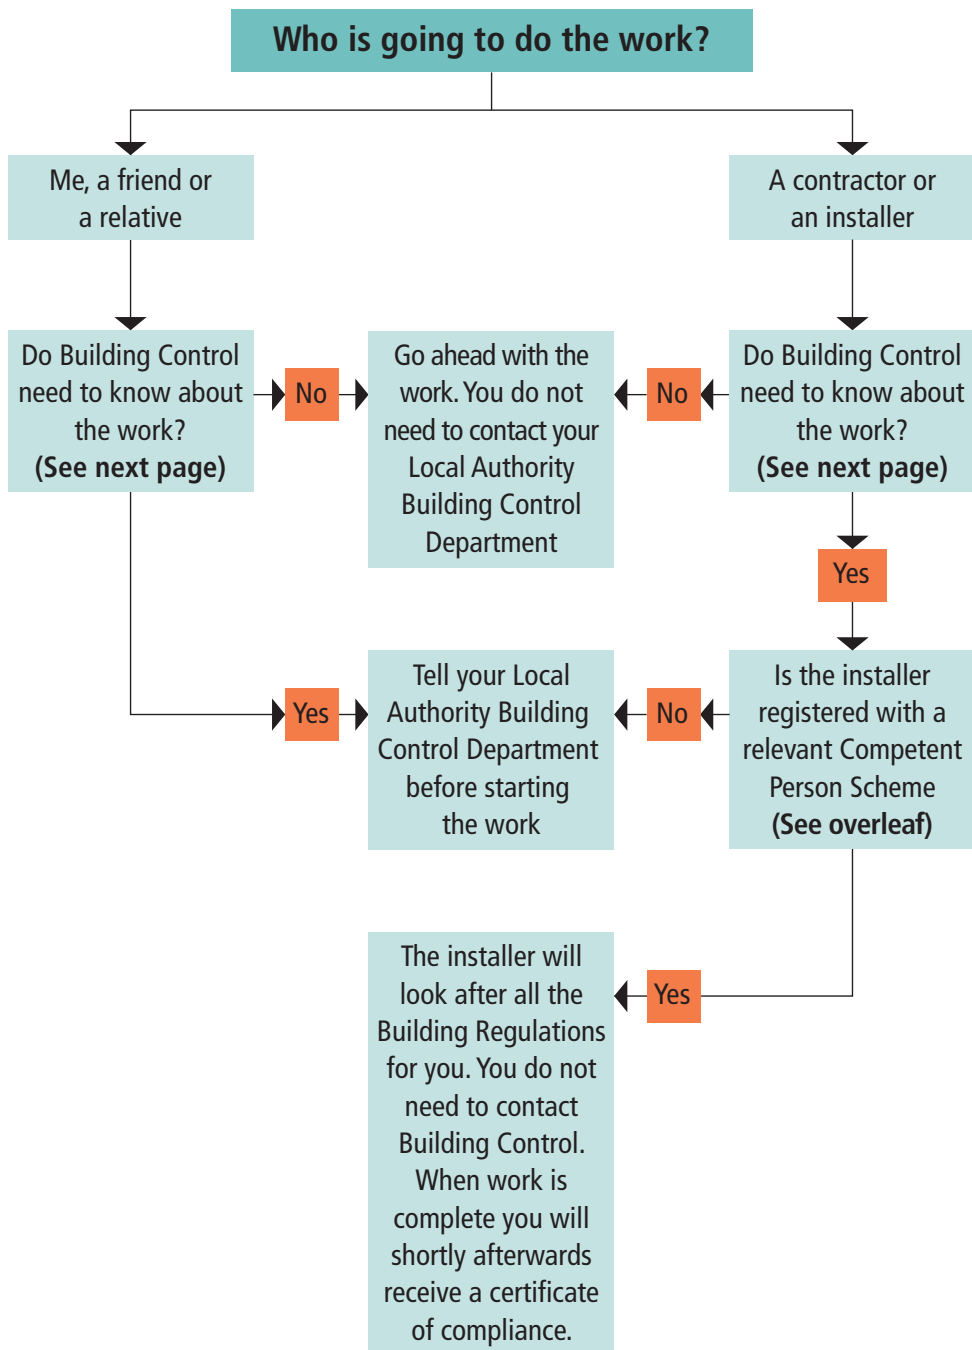

Why should I use an installer who is registered with a Competent Person Scheme?

- An installer registered with a Competent Person Scheme is qualified to carry out specific types of work in accordance with Building Regulations and will deal with Building Control issues for you. You will usually have access to insurance backed warranties and a robust complaints procedure to use in the unlikely event work is found to be non compliant.
- An installer registered with a Competent Person Scheme will notify the Local Authority on your behalf and will issue you with a certificate on completion which can be used as proof of compliance for the HIP. It will also show up on a solicitors Local Authority search when you sell your home.
- If you do not use an installer registered with a Competent Person Scheme then you will have to submit a building notice or full plans application and pay a fee to have Building Control come and inspect the work you have carried out.

How can I find an installer registered with a Competent Person Scheme in my area or check that my chosen installer is with a scheme?

Visit www.competentperson.co.uk and enter your postcode or the name of the installer in the relevant search box. Alternatively, contact the Competent Person Scheme operators directly; their details are on the back page.

How to meet the requirements of the Building Regulations

You **DO need to tell your Local Authority Building Control about the following work unless you use an installer who is registered with a Competent Person Scheme.**

- New installation or replacement of a heating system or any boiler, regardless of fuel type
- New installation or replacement of an oil tank
- Installation of a new bathroom or kitchen where there are alterations to existing or installation of new electrical and plumbing work
- Installation of fixed air conditioning systems
- Installation of additional radiators to an existing heating system
- Electrical work in special locations like bathrooms, kitchens and outdoors
- Replacement window and door units

You **DO NOT need to tell your Local Authority Building Control about the following work but you can still use an installer who is registered with a Competent Person Scheme.**

- Most repairs, replacements and maintenance work (though not replacements of combustion appliances, oil tanks, electrical consumer units or glazing units)
- Extra power points or lighting points or any other alterations to existing circuits (except in bathrooms, kitchens or outdoors)
- Like for like replacements of baths, toilets, basins or sinks

These are examples and are not exhaustive. If you need further information about the need to notify work being carried out then contact your Local Authority Building Control team.

Below is a list of the types of work covered by Competent Person Schemes. The scheme contact details are overleaf.

Installation or replacement of oil-fired boilers, tanks and associated hot water and heating systems
