Saving map searches
You can add a map search to your Saved Searches list in one of two formats:

- **Rectangular search** - saves all of the records of the selected record type that apply to the area currently shown on the map
- **Circular search** - saves all of the records of the selected record type that apply to the area within a specified radius of the map centre.

**Note** Map searches can only be saved for one record type (for example, applications) at a time. If you want to save a search for another record type in the same geographical area, you must save it as a different search.

**Rectangular search**
The rectangular search allows you to display occurrences of a record type over the geographical area currently displayed on the map. By re-running the search, you can monitor new occurrences. For example, if you have zoomed the map to display your town centre and filtered the legend to display planning applications in the last month you can save an extents search that allows you to monitor new applications arising in the town centre on a monthly basis.
