- Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes
-
- Q2. **Do you own or operate a local business?** Yes
-
- Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**
(1 = no, not at all, 10 = yes, very much) 10
-
- Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** No
-
- Q5. **Please use the space below to tell us what you think is missing.**
not answered
-
- Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**
(1 = No, not at all, 10 = yes, very willing) 8

Just to reiterate really, that our bus service is diabolical, so please make that a priority to get to Stamford and Melton. The connections at Oakham bus station have been out of sync for years and one cannot get from Stamford to Whissendine (as just one example) without an approx. forty five minute wait in Oakham, Likewise going to Nottingham, often a one hour twenty minute unacceptable wait in Melton. Re Wellness for Everybody: this is a joke at present. It's recently taken me SIXTY ONE on-line attempts to 'see' a GP three days later, by telephone only. Actually SEEING a GP is a thing of the past. However, any Green Initiatives are most welcome. As a member of Greenpeace for nearly 40 years, it's good to know that the Council is doing its bit.

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

It is what is is, a "vision" dreamt up by the woke, virtue signallers about an area that is dying because of it. We are not the twee market town that some seem to see it but a home for cafes, hairdressers and shops nobody wants and a town centre that died many years ago.

Q8. **What is your age range?** 61 to 70 years old

Permitting the development of large estates of houses risks spoiling the charm of towns and villages and overwhelming the local infrastructure. There is nothing in the document which suggests that large housing developments should be controlled. Future building should also involve a housing mix - starter homes, bungalows for the disabled or frail, etc.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? Carbon neutrality is mentioned in the Vision but the importance of this deserves more than just a mention even in this document.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

Vision is good but it is important that plans are made and costed to achieve the Vision. Time periods should also be mentioned in the Vision as there is no real indication in the report. For the Future Rutland Vision to come to life we must all have some idea of how all the wonderful words will become reality.

The commitment to be a leader for biodiversity is good. There needs to be more effort to achieve this. For example cut and collect verges in September rather than cut and leave the cut vegetation. See this example of how greater biodiversity is achieved by collecting the cuttings. https://www.denbighshirefreepress.co.uk/news/19688273.project-breathes-life-rare-wildflowers/?utm_source=Plantlife+email+updates&utm_campaign=139ac17376-EMAIL_CAMPAIGN_2021_11_05_05_59&utm_medium=email&utm_term=0_ce964b84b6-139ac17376-285887076&mc_cid=139ac17376&mc_eid=be095f4cce The County of Lincolnshire collects cutting for biomass plant. Change is inevitable... but at a controlled rate. Climate change will affect us all but if we embrace it rather than fight it, as we move into the future we can keep the essential character of the county. The move to electric vehicles should be encouraged as should a much better public transport network. We need a flexible "Uber-like" individual alternative to conventional taxi services. We need affordable personal transport at the time you want it, which can be achieved by the use of smartphones and some financial support from RCC.

The respondents seem to be heavily linked to older people, of which I am one. We need a more inclusive plan which involves younger people too or they will feel they have been excluded. Parents should be encouraged to know where their children are to limit the amount of asb we are experiencing. Leicestershire Police should second more officers to the area to combat the increasing levels of criminality being carried out in our county by career criminals from outside the area.

There is too much house building going on, with no infrastructure to support it. Doctors are shocking, by the time I get an answer on the phone my battery has died! Executives of the RCC are paid way too much and the council tax is way too high. Stop wasting money on 'wilding'the verges, that's just an excuse to stop cutting the grass. Each year we seem to get a bit less and pay a bit more.

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The building of new homes needs to be proportional to the actual needs of the county and NOT surrounding areas. This should be guaranteed in the vision. New homes need to be limited to the needs of the county and NOT create commuter/dormitory estates. Why only homes 'designed for carbon-zero'. This implies new homes only. Priority should be given to addressing the existing housing stock.

- Q1. **Did you take part in the Future Rutland Conversation earlier this year?** No
-
- Q2. **Do you own or operate a local business?** No
-
- Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**
(1 = no, not at all, 10 = yes, very much) 10
-
- Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes
-
- Q5. **Please use the space below to tell us what you think is missing.**
I don't think the Council are firm enough with businesses that ignore planning restrictions just to increase their pursuit of profits Quarrying Companies run rings round the county planners/
-
- Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**
(1 = No, not at all, 10 = yes, very willing) 2
-
- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**
.I had no understanding how so few councillors could over rule accepted Council future development plans

Rutland has been so unaware of its problems for so long and, even now, so still convinced of its superiority, that I cannot see that much of this plan is achievable as the main problems are lack of medical coverage, both GPs and availability overnight and particularly over the weekend and the constant reduction of public transport.

Sounds good but, like an artist's impression of a new housing development, this slick vision will undoubtedly be rather more pleasant than the reality. Please keep Rutland' identity intact. Don't allow housing sprawl outside of the Oakham bypass. Manage and safeguard Rutland's historic rural beauty and stand strong in the face of pressure and bland development proposals from developers who have no genuine concern for the county. Be brave and don't let Rutland and its market towns lose their individuality and quality. Multum in Parvo must endure. We are the County of Good Taste...so let's keep it that way.

Guarantee of Investment in the infrastructure- to make these goals achievable. We need investment in a new larger doctors surgery to cope with the extra demand of new houses. We've built 100's of new homes in last 20 years with no addition to Medical practise. Investment in making sure that county has a swimming pool all can use (catmose currently closed, Oakham school only available during term times. Uppingham requires motorised travel for Oakham residents.)

Love the draft. Holds high the positives of the beautiful county we live in, whilst leading it into the future. Just want a guarantee that infrastructure of health and wellbeing is a priority over new homes. We need to make sure we take care of the current residents, making them love even more where they live , so we create the demand for new houses we build, encouraging others to want to be part of our stunning county and quality way of life.

A serious look at planning permission for large housing estates and soulless global companies such as Costa and McDonalds needs to be done. It's all very well having this Draft Vision but if it's backed up by giving permission to these types of development every five minutes it makes it a nonsense.

Whilst Rutland is a lovely place to live by comparison to many other areas on our country, Rutland falls behind in continuing to maintain. Whether this be infrastructure our roads, pathways signage or even green spaces. Forget the big ideas of more infrastructure to build and maintain when you are unable to care for what you already have.

More detail on transport required. Railway connections eg changing at Leicester to go to Nottingham Nottingham train leaves 1 min before Oakham train arrives, Trains don't run late enough Rural bus services a disgrace. Not enough about vision on leisure. Not enough about shopping eg no quality supermarket in the county. Stupid rules on policing the waste centres petty rules stopping non Rutland residents anyone using the tip enhances the county . Rutland residents need to use surrounding. Tows and counties for cinema theatre and leisure

A bus service through the centre of Ryhall. There are many older people living here who have told me they don't go out because the walk to the main road is too far for them. A Kimes bus used to come through the village but nothing comes through at all now. A bus through Ryhall to Stamford would give these people something to look forward to.

The plan is so vague. Full of hyperbole and grand statements. This is easy to do but turning that into concrete objectives and plans is another. At the moment we live in a 'twee' place to a certain extent not in the real world. For example. Electric cars. Most of the High Streets have street parking how anyone can buy an electric car without access to an electric point is a problem. Housing for young people unable to buy their own property better shopping facilities and options Transport. When and what type will cope with getting people to work and for leisure. There are a plethora of other things I could raise

I have read the Vision draft and the more detailed sections for each area. My first comment is that, like most consultations, there is always a bias in those taking part. There are more females and there is a preponderance of older age group input. Many of the contributors, like myself, have lived in Rutland for a long time, this will affect how they will look on or accept change. This may restrict innovative ideas. The input of the younger age groups should be given equal consideration. In the coming years the Council needs to be honest about what can and can't be achieved and why this is so. For example, making sure that people understand that housebuilding is influenced by government edict and not necessarily by the Council. No government cares whether this changes the whole ethos of a county, they only consider the need to provide housing for their growing population.

A reality check is missing. The Vision is produced by consultants. How much have they been paid to produce platitudes.? There is no sense of reality and no sense of an understanding of the county and its infrastructure. People do not want a "strong and distinctive brand for the county" or to be led by "woke". Provide the services that are needed eg adequate GPs and stop wasting tax payers money on visions. The county is small, cannot support new housing developments, or enhanced infrastructure. Accept Rutland for what it is; spend tax payers money wisely and stop insulting the intelligence of the local population with documents like this

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** No

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

(1 = no, not at all, 10 = yes, very much) 7

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

It is rich in environmental and well-being aspirations but lean on vision and informed foresight. This needs more will do and much less visionary guff. We need some concrete thoughts on how Rutland will achieve a zero carbon status.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

(1 = No, not at all, 10 = yes, very willing) 1

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

This is Vision is not at all visionary. It needs much more mature and informed aspirations and more concrete thoughts and real proposals.

Q8. **What is your age range?** 71 to 80 years old

Q9. **What is your gender identity?** Male

Q10. **Is your gender identity the same as the gender you were assigned at birth?** Yes

Q11. **Which area of Rutland do you live in?** North Luffenham

Q12. **What is your connection to Rutland? (Select all that apply)** I live in Rutland

Q13. Which life stage applies to you? (Select all that apply)

Adult - retired

I've recently moved here

Q14. How long have you lived or worked in Rutland?

5 to 10 years

It's a very nice 'vision' but what is the point of it? Will this document, once it is finalised, be used to achieve the vision? What status will it have? If it has no status then councillors will continue to do whatever they want regardless of this 'vision', especially if the 'vision' is not in line with other personal goals or budget.

Any detail whatsoever. To coin a phrase, it's blah blah blah. It makes no reference to the ditches Local Plan or how any vision can be implemented without funds, these having been squandered on the draft LP. It aims to be sustainable, but the first I've heard is on the circular: sent out on 150g/sq m paper when 80 would do, and including a meaningless logo further diminishing the funds available to achieve anything.

Q5. **Please use the space below to tell us what you think is missing.**

It's all very well setting out in general terms a vision but it's the sort of vision that could be published for almost anywhere in the country. What is massively more important is what measures are going to be taken to implement this generic vision. Nothing seems to be said in the vision about the key role of Oakham. Nothing about the investment in infrastructure that Oakham badly needs. Nothing about improving the west end of Oakham which for years and years has been the ugly duckling of the town. Nothing about regenerating the derelict buildings of the town. Nothing about supporting local businesses to be a big part of the towns future. We've had town centre managers, plans to develop a one way ' partly pedestrianise the high street - all to no avail. This vision will likely come to nothing also. Sorry for the cynical view but this is my experience of RCC and it's competence in looking after the town and county and it's people.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

Rutland and Oakham in particular has been a story of local authority incompetence and lack of real action, poor decisions, in fighting, missed opportunities, etc for far too long. Let's hope this initiative is not just another cover story for RCC incompetence.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The one thing that I believe needs addressing, particularly in Oakham is the infrastructure of the drains. I have never lived anywhere that has so much trouble with sewer smells everywhere. There isn't a week that goes by when I don't get the smell of a sewer when I am out walking which is most unpleasant. indeed, we have lived here just 4 years and have had numerous problems with drain smells at our relatively modern house which seem to be unfathomable to everyone we ask to look at them.

The Vision is certainly a agreeable template for what our County should be seeking to achieve but can this sustain through successive administrations where interests, aims and budget can become distorted. I have to say that during my 12 years residence in the County there have been times when my trust in the authority has been disturbed by decisions that have been made to pursue, or not, projects or policies that are not entirely in the public's interests but have a hint of favor.

You briefly talk about walking but omit that Rutland is one of the best places in the country for horse riding and has a network of bridleways to which people from all over the country come. It is also renowned for the challenges it offers to cyclists.

As secretary of the Leicestershire and Rutland bridleways Association I would be happy to help make people more aware of the excellent asset their bridleway network is, not just for horse riders but also for off road cyclists, dog walkers who can't manage stiles and those using outdoor wheelchairs - bridleways don't have stiles or narrow gates,

Q5. **Please use the space below to tell us what you think is missing.**

Our main area of concern is the speed and volume of traffic through residential areas. We are encouraging young families to live in Oakham but traffic speeds in roads such as Cricket Lawns, Brook Rd and Stamford road at times reaches unacceptable speeds and soon enough there will be a fatal accident. Traffic calming measures are of a priority to lessen the risk of such an event.

Many of our primary schools are now far too small and outdated. There needs to be a long term plan of either improving existing buildings, eg building a second floor over existing single story schools, or replacing them entirely by building a more appropriate building perhaps in a different location within the town or village. Some schools are too small to be realistically viable, such as Great Casterton and Exton. Consideration should be given to creating a larger school for several villages to use.

All of the expectations in the Draft Plan will need careful coordination, so that no unnecessary overlap occurs, nor useful opportunities missed due to presumptions that 'another group' will complete a specific task. Specialised groups should be led to make sensible plans which can be implemented in a timely manner, not referred around committees for months - or years on end.

I accept that this is a draft vision, but it is one containing conflicting aspirations with elements that are mutually exclusive. For the vision to be of any practical value, it has to be realistically deliverable otherwise it is mere platitudes. The vision needs to be more joined-up in its core components so the vision can be ultimately translated into an integrated delivery plan. If the vision cannot be developed into a strategic delivery plan that delivers enhanced values with positive change then it's in danger of being an academic exercise which gets kicked into the long grass.

In order to keep people 'on board' with the Vision will you be telling us about plans and actions, as they arise, to take the Vision forward? Although there will be a review in 2026 on progress, people may lose interest if they are not being kept informed regularly on developments. This may also help to quieten the cynics who may say that it is all just a paper exercise.

The vision reads as generic in that it could apply to any county with a largely rural community. As such it describes a place, and covers the most important factors, in such a way that makes it an attractive and fulfilling place to live and cannot be argued with. However, whilst alluding to the county's special character it does not clearly define this or the factors or elements that form it. I would have liked to see the inclusion of the evidence that determines the goals. For example is it the size of the population, or it's demographic make up, relative to the physical size of the county? Is it because of the fact of only two towns, and their size? How relevant is the change made by Rutland Water? As the vision is taken forward it is, in my opinion, to inform people based on carefully collected evidence that gives clear and measurable goals. I applaud the process and motivation to determine how to form and maintain the county as a place people want to live in particularly as it aims to address the needs of all residents. I am certainly not critical of the aims and recognise that each reader would express their, often different, priorities. It will be a challenge to satisfy everyone but it is a good starting point from which to determine clear plans for different aspects that can be coordinated.

Indeed this Draft Vision is not a detailed plan. It could not contain less detail if you tried. So you asked the people of Rutland what they wanted and the answer was to be happy and healthy in their environment. Well that was a surprise! Forgive me but this eleven page 'Vision' is nothing more than a generic public sector pamphlet saying absolutely nothing, full of flannel, promising nothing or indeed committing to solving anything. Purely an exercise in justifying numerous public sector employees with expansive job titles and no doubt even more expansive salaries. I can only imagine how many meetings, consultations and brain storming sessions took place to achieve something so banal and which only insults the intelligence of your hard pressed council tax payers. Indeed as we are one of the highest, if not the highest, council tax payers in the country this only illustrates as to why that might be. Rutland is indeed a great place to live and it needs very little to make it better. Rather than stating the bleeding obvious and debating your 'vision' you should be addressing our immediate issues. Specifically in Oakham the woeful offering of Doctor's surgeries and the failure to do anything to support the retail sector resulting in a constant churn of shops in a High Street which has so much potential. You have, as ever with Government, allowed residential expansion without due regard to infrastructure. Your only interest to collect more Council Tax to balance your already inflated budgets which are primarily needed for the outrageously expensive legacy pension payments being made to your predecessors. The same people who would have in their time produced similar documents to this Draft Vision to justify their existence. There are many people working within Council services that do fulfill important roles and provide us with the services we need but the group working on this do not come within that remit. You are superfluous to the needs of residents and businesses alike with this vacuous pointless document.

Perhaps a little more dynamism - many Rutland residents are comfortable about the way things are. Perhaps we need greater emphasis on welcoming and managing change for the better and to acknowledge that planned, positive change improves things for the many, even if some find it might not improve things for them personally. If we value community we must continue to look for the good of the community and not just for ourselves.

Thank you. A great effort, well organised and conducted. It would be good to find the finalised document in public spaces - learning centres, cafes, libraries, GP surgeries, village halls etc. excerpts on screens in public waiting areas, public transport etc. and of course on line - to communicate with everyone and to encourage an inclusive community and continuing innovation.

Think the vision is positive and aspirational and sums up things that are important to me and you family. I truly hope that decisions on how to make this happen are consultative and that local people are heavily involved in the planning and implementation process . In recent times some of the decisions made by County Council haven't felt as though they're not in the best interests of the community and or local businesses eg McDonalds but have rather reflected the self-interest of those with those with the voting power. Could some local decisions be agreed via local referendums maybe?

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

Please consult local people when making decisions about how to implement the visions so that decisions are made in the best interests of local business and the community and are truly consultative, Some of the recent decisions made by Council reflect the self interest of those on the council rather than the genuine needs of the local community. Apart from a handful of jobs, McDonalds has not enhanced the local area . It's not brought people into the town or boosted local tourism. Please put efforts into attracting technical, commercial and small scale manufacturing businesses to the area to bring skilled work and revenue to Rutland 's whilst retaining its beauty. There's a massive expansion of housing without the employment ,learning , leisure, transport and health care infrastructure to support this. However , the vision has set out a good plan to redress this balance

Great work thank you. My only concern is the gaping hole left by having no Local Plan making our goals unlikely to be achieved in the short and medium term. Can developers be made to install green solutions NOW please or we will inherit hundreds more homes in the county with gas boilers and missing other new environmental technologies. Also is infrastructure addressed adequately?

- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**
"Health and care services be easy to access when needed" This statement is paramount. The healthcare system in Rutland is failing. Access to the surgery is nigh impossible and urgent cases are falling through large gaps in administration and medical care availability. Examples include: An 87 yr old relative with a failing pacemaker, having received a letter from the consultant stating her case was 'critically urgent', was unable to see a doctor for several weeks. She had their heart medication stopped when she was continuously unable to get the medication review appointment she was instructed to make. She then, recently, had to have her breast cancer review over Zoom, which was extremely inappropriate Another example - Trying to get an appointment at the surgery has involved. 1. 45mins engaged on the phone 2. 45 mins on hold, to be told there were no appointments and to call back in 2hrs or book online 3. No appointments online 4. Using the triage surgery app- waited 3 days for a response to be told to ring and make an appointment 5. See 1. .6.Eventually i waited until midnight to book ,to find at 00.01 there were only 2 appointments left These are just a few examples Reading local forums, these are not unusual cases. but the norm. Before many of the other issues in the Vision are addressed, these fundamental failings in healthcare need to be of the utmost priority

I do not think that we are a big enough county to want it to become a cultural/ sporting / leisure resource for the whole of the East Midlands. Let's just concentrate on getting it right for Rutland. The reason Rutland is so lovely is because it is small and not overpopulated. So say no to big developments, superstores etc.

The following three comments in the Vision give me hope that the people in Rutland have been listened to: "Rutland's market towns of Oakham and Uppingham will thrive as vibrant destinations to shop, socialise and enjoy life" "Growth in Rutland will be sustainable and preserve the county's quintessential character" "Rutland will strive to become a carbon neutral county where environmental sustainability complements rural living" Rutland County Council now needs to work hard with the community and develop quickly a new Local Plan based on the above comments, keeping everybody informed of their progress on a regular basis in a open and honest fashion.

Improved public facilities in the towns for adults and older children/teenagers, such as a swimming pool, the encouragement of more interesting shops as we have too many hairdressers coffee shops and charity shops. Fashion retailers gift shops and furniture shops seem to have problems sustaining income vs outgoings particularly local rates . There is nothing for the older teen to do here. They all end up desperate to move on as soon as they can. Proposals for a cinema are hopeful.

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The vision reads a bit like everyone's wish list. There is not hint on how or even what might help to achieve this halcyon vision. Also some of the vision itself is very vague. I read it as most people want the status quo to be maintained with better buss and train services. Improved access to medical services is more than improved busses; it is virtually impossible to get through to the Oakham GP surgery for a timely appointment. I suspect this is because of the increased population around Oakham with no increase in the provision of health care facilities as well as the extra stain of covid.

Whilst not intended to be a detailed plan, the Draft Vision lacks any detail whatsoever and given the recent debacles of pedestrianisation in Oakham, major residential development at Edith Weston and the S106 payment cock up at Barleythorpe, can we really believe that Rutland County Council has the ability to deliver these aims?

Mainly the high level, largely generic waffle that comes from this sort of exercise. You need to follow through with detail on how these aims will be delivered in order to secure widespread buy in. At the moment businesses thrive and people enjoy living in Rutland in spite of Rutland County Council not because of Rutland County Council.

-
- Q2. **Do you own or operate a local business?** No
-
- Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**
(1 = no, not at all, 10 = yes, very much) 5
-
- Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes
-
- Q5. **Please use the space below to tell us what you think is missing.**
1. Inadequate control of Anglian water to curb their activities to limit and manage the visitor impact on the County. 2. Inadequate control of traffic impact and parking on small villages within the County. 3. Appalling performance of Rutland Planning and Planning Cttee who continually fail to support local families with affordable housing and self build opportunities within the County. 4. Outdated notion of 'Restrained Villages' which prevents sensible and sensitive development of packets of land for self build/local families on edges of villages when existing residents have already extended their amenity spaces beyond existing limits of development.
-
- Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

A clearer exposition of the 'processes' that will help inform the implementation of the Vision and how people might engage with these processes to influence and help deliver its outcomes. Process-based indicators will be needed to monitor progress towards desired outcomes.

- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

In relation to climate change, the Vision highlights striving for carbon neutrality, but fails to explicitly address the need to adapt to the inevitable impacts of climate change (floods, droughts, heat-waves, etc.). The crucial links between biodiversity/nature conservation and climate change adaptation through nature-based solutions needs to be better highlighted.

Investment of funds for council and local people. Transition support for individuals to make changes, in particular for workers in high carbon pathways. Ketton Cement works transition. Rewilding and preservation of access to green space. Increased decision making in the hands of local people. Adaptation to the oncoming climate change to make the community more resilient. Adaptation of our heritage buildings to assist the county reaching net zero.

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** No

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

(1 = no, not at all, 10 = yes, very much) 8

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

The biggest concerns of Rutlanders is access to appropriate infrastructure and resources, especially in light of the number of new houses continuing to be build or planning applications applied for. The most urgent is sufficient GPs. But also, maintaining a local hospital and ensuring the road structure etc. can support the continuing increase in population. The vision should include all rutlanders having access to the resources they need: GP, school places, in county healthcare, social care etc.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

(1 = No, not at all, 10 = yes, very willing) 6

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

How does this vision work in light of continued plans to build additional houses? The vision talks a lot about maintaining green spaces and the value of our rural location which is definitely true. Equally young adults will need places to live when they grow older, and Rutland in a popular location to settle for other, especially from London where the house prices are very reasonable in relative terms. This is a hard juggling act, what the vision for the right balance?

Q8. **What is your age range?** 41 to 50 years old

Q9. **What is your gender identity?** Female

Q10. **Is your gender identity the same as the gender you were assigned at birth?** Yes

I am a retired GP. In my opinion the area does not have enough medical practitioners and at the last general election it was promised that Oakham and Melton would each have another practice. Neither of these events have taken place and further more from what I hear, people have been telling me that further development is taking place on the Braunston Road in Oakham and this will make the matter worse. In my opinion before the area admits more people to live here they should make sure there is the required number of medical practitioners and nurses in the area to look after them with care and efficiency.

- The petrol station , with car charging points, on A47 is a good idea.
 - Where Budgen's is located is dreadful for parking. It should be flattened and moved to the petrol station on the A47, on the outskirts of Uppingham.
 - Stokeston Road has speed bumps because of Uppingham school students(who have suicidal wishes) , however, cars park on the road, so they are not effective.

- There need to be more of a police presence. We get forgotten because we are in the country, right on the border. I was burgled 3 or 4 times although it was 15 years ago. The estate isn't as bad as it used to be. I cannot get access to the medical centre in Stamford. Can't get through on the phone. Am due my booster, but haven't been contacted yet. Had to sort my first vaccination out myself too as the NHS didn't contact me. What will happen if I get really ill? Although I am in good health at the moment.

Protecting Rutland's Landscape is not mentioned in the Vision. I think that 'Landscape' or 'the unique character of the Landscape' needs including, because it is an overarching way of connecting the countryside, villages, and the towns - and is relevant to each context. Protecting the landscape, would show that we are going to look at how Rutland changes over time at a landscape scale too - protecting one of the most important qualities of Rutland that is so cherished by Rutlanders and enjoyed by visitors. By traditional standards the paragraphs on sustainability, nature & bio-diversity may seem strong - They are nowhere near ambitious enough to meet the challenges that science confirms are coming our way. High building standards, with net biodiversity gain, plus looking for some opportunities for nature is not enough. We should be working with our partners in the utilities / land management to build resilience into energy, waste, farming and water provision. Rutland could be looking to understand, enhance and reconnect the natural infrastructure that we need to make ourselves more resilient to climate change, so that the natural world that we rely on has more capacity to cope with rising temperature and greater extremes in weather. The "John Clare Country" project between Peterborough and Stamford is a good example of how to identify, assess, plan and enhance the networks of nature that enable a place to function. Specifically understanding and then systematically enhancing our green infrastructure is what I think is missing.

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

No mention of 'trees' at all. They give the county much of its character. Lyddington has lost its two most important trees in recent years: 1) the Scots Pine opposite Windmill Way; 2) the Bede House Sycamore. Both said to be 'diseased'. Both probably preservable with skill and the will to do so. So easy to say "diseased" and appeal to people's fear instinct.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

Some mention of awareness of Cop26 as it applies to industries, such as Ketton Cement whose coal consumption is comparable to that of a power station. Addendum to item 6 above: Yes, willingness is at level 5, but health and energy factors at age 80 and being involved in caring for my wife, mean that ability is limited to computer-based activities at home.

Q8. **What is your age range?** 71 to 80 years old

Q9. **What is your gender identity?** Male

Q10. **Is your gender identity the same as the gender you were assigned at birth?** Yes

Q11. **Which area of Rutland do you live in?** Lyddington

Q12. What is your connection to Rutland? (Select all that apply)

I live in Rutland

Q13. Which life stage applies to you? (Select all that apply)

1. Make a minimum of 1 beach area on Rutland water available as "free access" for all, with free parking. 2. Enable and make available communal gardens or an area where people can plant a tree sapling that they have grown, and not just around the County Centre of Oakham. 3. As someone who is heavily into DIY it would be nice if the council had a materials reclamation site/service where people could go and get anything for example; say a TV or a kettle, a piece of secondhand carpet, half a bag of cement, secondhand timber or castaway furniture, items of decor. There are so many items and materials that go to the tip instead of being reused. I use Freecycle alot but when I do take anything to the tip it is truly at end of life. I also see an awful lot of items and materials that could easily be reused and given new life. There are still people out there that do not use or have not heard of Freecycle. It is all such a shame, so much stuff. I know some areas of the UK already operate such facilities, in particular I know that the Leeds area operates something like it, but not sure if its council run. Also take a look at the Corby auctions Facebook page as I believe that alot of the stuff they sell comes from landfill.

Appreciate that this is a visionary document but it does not really answer the question: How does this make any tangible difference to the way that we live in Rutland?

The FRV document lacks detail. People need to be able to associate what it means for them. All the visionary things listed are strategic goals that the vast majority of councils would aspire to. Could we have some detail so that we can actually have a meaningful conversation. People want to discuss: local housing (the North Luffenham new village), how do we keep the high street alive? Local amenities - No swimming pool, no cinema, no recreation facilities for young people. It feels like a county where the needs of the elderly population takes priority. We have very high council tax rates, compared nationally, but are we getting value for money.

A purpose built leisure centre for all folk to enjoy... a swimming pool; an indoor sports hall for badminton/ table tennis/ indoor football/ a small gym/ and a small cafe. Also a proper community centre - if the Victoria Hall is going to be converted into a cinema why can't the old Post Office building on the market place be used as a proper community centre?? Instead of letting it fall into disuse ??? You say there is a community spirit in Rutland- maybe so in the villages with the village halls being the hub of the village - in Oakham there is Non !! Everything is splintered around the town ... Oakham needs a proper focal point for everyone and all organisations to be able to make use of. I would like also to say that the treatment of Oakham people by the Oakham Medical practice is deplorable. - The doctors seem to have all but disappeared into thin air on huge salaries , or worse, huge Locuum payments. Some very bad practices going on there which I assume we are all paying for !!

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** Yes

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

(1 = no, not at all, 10 = yes, very much) 6

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

Some information including facts, figures and forecasts. It's not meant to be too detailed but without this it's too general and open to misinterpretation.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. I think it's a complete waste of time and money it is just words and serves no practical purpose. As a percentage of the population hardly anyone got involved in this. It's at best a two page mission statement. Rutlanders want action not a vision, they want another GP surgery before more housing as they are genuinely scared they won't be able to access medical help when they need it. What's the point investing in cycle lanes, serious cyclists won't use them they still use the roads anyway. Everyone says they want better public bus services but many run with one or two people and they may not be viable as the main users get free travel. All brownfield sites should be exhausted before building on green land but because the local plan has been kicked out it's opened up the floodgates to greedy developers. Quality of life and access to the countryside, over past 10 years it's become an extra 5 min walk to reach the countryside. At this rate of Oakham expansion in another 10 years residents will have to drive to the countryside. Do we want it to be a safe, healthy community to live in, well we are all going to say no aren't we? I mean doh! . This vision is a complete waste and inappropriate use of council tax payers money the only upside is it gives someone a job, so I hope they like their job.

We must not build too many new properties in our towns and villages as it will spoil everything else that is within the document and also local services will be unable to cope with large increases of population. Design of new homes should be in keeping with the neighbourhood, not as some that have been built in the County.

The promise to promote wildlife etc. That should include meadows and green spaces already existing Not to be used for building estates. For example:- Larkfield proposed plans on the border of Stamford/Rutland. Our county should be setting an example to the country to not approve such developments. And protect our green established wild meadows and ponds.

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

A great Vision if it is achievable. No mention of speed reduction measures on village roads especially near schools. That is methods that are affective. For example Ryhall Road Great Casterton.

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** No

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

(1 = no, not at all, 10 = yes, very much) 10

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

Although the Vision is not meant to be a detailed plan, it does need to have more detail to have any real meaning. In particular it needs to underwrite developments in health and social care as Integrated Care Systems are introduced, and the Leicester hospitals are reduced from 3 to 2

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

(1 = No, not at all, 10 = yes, very willing) 7

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

It would be helpful to have a series of meetings at which the future interface and interaction between RCC, the NHS and local volunteer organisations could be developed

Q8. **What is your age range?** 71 to 80 years old

Q9. **What is your gender identity?** Male

Q10. **Is your gender identity the same as the gender you were assigned at birth?** Yes

Q11. **Which area of Rutland do you live in?** Pickworth

Q12. **What is your connection to Rutland? (Select all that apply)** I live in Rutland

Q13. Which life stage applies to you? (Select all that apply)

Nothing is said about making leisure activities more affordable. There actually aren't many places that are car free to go for a good walk in the county. Rutland Water is lovely but it costs £4 for 3 hours. Ridiculous price. Such a shame the people of Rutland are put aside for tourists there. We need more green spaces for walks, and not just the size of Cutts Close Park! Also I know this wasn't a detailed report, but it really did need some more detail. What is written in there is what was always going to be written in there even without consultation. Please make some proper changes to the towns and not just build more houses!

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. A few big things need changing in the town that the council have to lead on. The town centres are unsafe with constant cars and people trying to park. I don't understand how I can make a difference to this. I pay a lot of council tax to ensure the council do some of the big work for me already. Maybe we just rejoin Leicestershire and stop paying ridiculous prices to live here

These are big woolly statements which have potential to be used in different ways later to justify Council actions and decisions. Definitely needs greater clarity. Simply making our villages a place for others to have 'a great day out' has massive negative impact on our own quality of life. What does Rutland Cycling company do for us ? - nothing, just fill the village with bikes and rude cyclists. No detail on planning

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** No

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

Q5. **Please use the space below to tell us what you think is missing.**

More emphasis on the fact that this is aspirational and a "wish list" and that not everything can be achieved due to both financial constraints and what is actually in the Council's power to change (- please don't raise people's expectations because when other groups don't join in or do as wished, it looks like it's the Council's fault and the Council gets enough undue bad press as it is - for example the antisocial behaviour at the Showground was not the Council's responsibility at all, but the Council got the backlash for it). Medical facilities, affordable (for who?) housing, transport links to other places, leisure facilities, adult education all need outside support and aren't really in the Council's control. Whether people are willing and ABLE to get involved are also two very different things.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

(1 = No, not at all, 10 = yes, very willing) 6

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

It is better to under-promise but exceed expectations rather than the other way around - a video shown for this project talked about encouraging local businesses yet showed a business which hasn't been trading there for years. You need to emphasise what the Council is responsible for/has the power to change too, otherwise you are setting too high an expectation and if other groups don't want to provide the services, it'll be blamed on the Council entirely - see previous comments re Showground

more on the protection of the environment and a guarantee that new houses will not be built at the expense of the wildlife eg: on the site of ground nesting birds and natural wet/boggy areas. Greater protection for biodiverse areas that are outside of the 'nature reserve' area but are just as important for wildlife and the local community

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

the Draft version says a lot and sounds like a solid plan, however there is already a current planning application to build 95 houses on an area of greenbelt land on the edge of Cottesmore - this development would not be positive for wildlife, for the local ecology or for the historical value of the proposed site. This site has been rejected for these and many other objections previously, so how can it be considered again? The only thing that has changed is that the area now has a greater diversity of wildlife. If the county is to become a 'leader and innovator in environmental issues' then we need to do that and not even consider a development that would be in direct conflict of this.

The vision is hard to argue with, and reads like a view of paradise. In reality, it needs to be braver and to prioritise. And that is where it will face the hardest challenges.

This will be about building consensus, rather than launching grand plans. It will need strong and balanced leadership to step away from a pointless scrap between self-interest groups. I hope we are up to the task!

The vision lacks any meaning or purpose. This vision lacks responsibility and ownership from the council. Terms like 'empowering' are seriously ill-conceived. The document has no substance and spouts generic rubbish. It shows how out of touch the council is. This vision could be for any region in the world.

- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**
This really is a terrible body of work and not worth the considerable time and effort I imagine was spent on it. It is an overly wordy document that says very little. Platitude heavy. People simply will not buy into this drivel... "The county's exciting leisure offer"... "technological advancement and innovation". It lacks a real understanding of Rutland and the needs of its people. Ultimately the vision lacks vision and ambition. Start again.

We know that it will be necessary to redevelop North Luffenham Barracks for housing, but please do not continue with proposals for thousands of houses. Why not think in terms of just hundreds of new homes, lots of green space, and farmed fields to maintain Rutland's beautiful countryside.

To be low carbon there is a fundamental problem with electric cars and those who would like to have one. They can only really be charged if you have off-street parking. It is not reasonable to charge in a car park somewhere. There should be dedicated bays on every street specifically for charging electric cars where people can lock in their lead. This needs to be addressed. Perhaps not now but definitely in the near future.

There is no acknowledgement of the proposed major infrastructure development "Mallard Pass Solar Farm". In my view, this development flies in the face of everything that the future vision embraces. On the one hand, we need to keep pace with the need to transition greener energy however not at the cost of wildlife, open spaces and the loss of substantial amounts of agricultural land which would result in an even greater reliance on imported footstuff leading to a greater carbon footprint.

Ambition and urgency - Some ideas - Rutland should be the first county to aim to be carbon positive by 2030. Rutland could aim to be the UK leader sustainable farming. with a sustainable farming R&D and college. Rutland could aim to treble sustainable tourism by 2030. Work with Anglian Water to make Rutland water the top eco destination sport in the UK at least give it some more exciting mountainbiking trails. Rutland could be the cycling holiday capital. Every village to have a circular economy hub where be can buy and sell/ share stuff rather than dispose of it. After we achieve carbon zero we are then into putting the world back the way we found it. The UK has lost over 80% of its forests it would not be unreasonable to set a goal of rewilding 50% of the Rutland and becoming a world leading eco-tourism destination as a result. Modern low meat agriculture only need only a fraction of land to feed us. Hydrogen buses to the main London train stations would bring wealthy eco commuters from London. Put a new best in the country electric/ hydrogen service station on the A1/A606 gateway to Rutland selling Rutland local produce with a cool eco hotel base for people to launch on walking and cycling holidays round the villages.

I think I have said a lot above but prioritise the agenda on what will help us lead the UK on meeting carbon positivity and resulting high quality/secure jobs people need to thrive. The plan vision document is too much rural idyll focused rather than leading edge sustainability powerhouse.

Sustainable transport- Small minibuses for villages but more frequently. Late evening, early morning and weekends. To utilise other transport links and serve working population and leisure visiting. Proper traffic free cycle routes from villages into Oakham and Uppingham where applicable. Utilise existing bridleways. Appropriate surface for all Weather. Negotiate with landowners. Appropriate remuneration. Use of brown field sites for development. Limited development in county areas where travel by car will be needed to access essential services. Limited and controlled development which will impact on green space, natural habitats and biodiversity. No development in areas which experience flooding and poor water surface drainage. Better Primary health care services. Additional GP practice and development of existing urgent care. All essential to reduce the pressure on hospitals.

The vision is just hot air - an aspirational wish list with very little prospect of being properly funded . What is missing is simple realism and honesty. RCC has a track record of dragging its feet with improvements (Oakham town centre and cycle paths to outlying villages being two examples) plus wasting huge amounts of money on 'process and procedures'.

- Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**
The Vision does not seem to bear much resemblance to reality! Transport links here are extremely poor, and it is difficult to use public transport to get to hospital appointments in other towns. Funding for the swimming pool and Arts 4 Rutland have both been cut which does not fit in with a vision for great leisure and cultural facilities. I think the Council should concentrate on providing core services such as re-opening Customer Services, rather than looking at global issues.

You perhaps didn't mean to use the word Equity. Equality simply means everyone is treated the same exact way, regardless of need or any other individual difference. Equity, on the other hand, means everyone is provided with what they need to succeed. Justice is when the barriers that prevent equality and equity are removed.

Tackling the streets too busy to navigate due to parked cars. This is both in the town centre (Oakham) and surrounding neighbourhoods. The High street should have no on street parking, this causes a lot of dangerous situations and walking on the narrow pavements feels like a risk. parking on double yellow lines happens daily due to lazy privileged people, this needs stopping. No more big housing developments until there are improvements to infrastructure and amenities.

The plan is not designed to concentrate on detail but whilst promoting a peaceful, healthy and comfortable lifestyle, it does nothing to acknowledge or address the negative impact on the town from the levels of noise pollution created by the now busy freight train line. The south of the town is blighted by the noise created by freight and its attendant impact on general health and well being and mental health is not reflected in any way. The image of a peaceful market town is all but destroyed.

Currently there is a distinct lack of 'anything' for young people to do. The vision talks about YP being able to fulfil and reach potential in Rutland. This couldn't be further from the truth. Older population want YP to be tucked away and not heard. No swimming pool, youth club provision etc that is low cost access. YP are the future of Rutland start investing now!

Safety- roads , improve quality and reduce sign post obstruction by hedges etc Police- don't focus so much on speed watch by civilians! if local issue then police officers and camera vans. Doctors- continuing growth of the town presents problems. We cant even go into our practice, more face to face required and faster access to GP, sitting outside is grim. Quality of life- adequate police patrols both in rural areas and in towns re anti social behaviour plant more trees

There is no mention of employment beyond "independent businesses and entrepreneurs" and (necessarily unspecified) plans to "grow Rutland's economy". Although this is a vision document, not a strategy, it needs more specific reference to sustaining and growing appropriate employment to encourage those who grow up here to stay here, and providing opportunities to develop sustainable busines. Also, transport needs to make reference to people travelling to work (and for leisure) beyond the county boundaries.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. 1. The important role of the Local Planning Authority in achieving this vision does not appear to be acknowledged or mentioned. 2. The statement describing plans to grow Rutland's economy are far too vague and open-ended to be meaningful. They require further qualification. 3. Statement that Rutland will continue to look beyond its borders, working with neighbouring counties etc etc needs significant qualification to earn any confidence from the community. Recent history of this approach raises serious questions over value for money and the quality of service Rutland receives in the areas of environmental services, biodiversity and ecology and minerals advice. 4. Beyond the Vision: Progress against the Vision should be reviewed and published at least once in every year to ensure that genuine progress in accordance with the vision is being maintained.

- Q1. **Did you take part in the Future Rutland Conversation earlier this year?** No
-
- Q2. **Do you own or operate a local business?** No
-
- Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**
(1 = no, not at all, 10 = yes, very much) 6
-
- Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes
-
- Q5. **Please use the space below to tell us what you think is missing.**
Road bridge or tunnel on the southern side of Oakham.
-
- Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**
(1 = No, not at all, 10 = yes, very willing) 1
-
- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**
The fact is that Rutland is a rural county where transport to the two main towns is by road/car & regardless of public transport pipedreams this will be so for many years to come. The Vision has virtually no relevance to anyone other than those that wish to make money from tourists. So if you're xenophobic, run a local business & have no wish to ever travel beyond the county, this Vision is fine.

- Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**
I think we have a real opportunity to emphasise Rutland's unique potential to be an showcase for protecting the environment, making use of our natural resources and investing widely in supporting infrastructure e.g. EV charging points, and ensuring all new homes/businesses are built with an emphasis on saving the environment. I think this would also attract new investment to the county.

The environmental sections don't go nearly far enough - they're all about individual responsibility - nothing about address industrial and agricultural pollution. Rutland is currently only an inclusive place to live if you're white and well off - I don't see how the Council is planning to address this.

Much of the vision will only be delivered by an effective and responsive planning system supporting a Local Plan and Neighbourhood plans which reflect the vision. There is no mention of this or the steps that the County Council will take to ensure these are in place. Without this Rutland will not be in charge of its own destiny

Sustainability: Access to suitable housing for all should be part of the vision . This means a commitment to providing Affordable Housing both to buy and to rent. Requiring new housing to "meet the highest possible environmental standards" is a double edged sword. The costs of meeting these standards will mean that new housing will be even less affordable than it is now. Healthy and Well: Easier/quicker access to Emergency health services should be a priority Reduction in rural crime should be a commitment

Your "county for everyone" is typical Woke nonsense. It is this kind of liberal thinking that has destroyed social cohesion in many towns and cities in the UK. The Muslim Grooming Gangs scandal was, in large part, caused by this kind of liberal madness. People in general, but women and girls in particular, are simply not safe in immigrant areas.

A lot of young adults and children have links to Rutland dating back generations. Sadly the housing market ladder is no longer affordable for them. Affordable housing for those with links to Rutland would be appreciated.

Keeping Rutland as a rural community and not just a commuter county will be the challenge. The balance between creating business and higher paid skilled jobs within the county that allow younger people to remain and work in the county is not being addressed thoroughly enough.

This just seems like a waste of time, money and resources with this pie in the sky document. Rutland is becoming a place for the rich and there is no money being put into any of the facilities. Doctors are over subscribed and can't cope with the current demands without any new builds being done, the swimming pool has been left to rot and is now a health hazard and the staff can't enter that area. The high street is a joke with hardly any shops you want to shop in on a normal wage. Council tax is too high and you don't see much for your money. It's a lovely place to live for the Rich.

Whilst I realise this is not a how to guide but a what we would like guide, I am concerned on the lack of planning/information regarding health and wellbeing, especially in Oakham, where presently there is only one Medical centre, which is massively over stretched and quite frankly short of doctors. I believe a guide should contain a little more information regarding community health care, as it is such an import issue within Rutland especially Oakham.

Whilst I find the vision very positive, but I feel to be honest anybody can write down a utopian vision of society, the vision is so lacking in detail it is borderline pointless ? I am sure it is the same as 100 other visions created up and down the country, at a cost? in short very generalised and I am not convinced we gain anything from it.

The vision really isn't telling us anything to agree or disagree about. Of course it should be a given that we have a successful, inclusive and green society. The point is why hasn't this already happened? I've never seen the council support any initiatives to these aims. In fact its anti green stance and blatant corruption is embarrassing

Assurance that housing development will be consistent with the vision. Particularly, farming land which feeds the community should not be given over to housing which needs more farming land to fit it. I'm very suspicious.

I would suggest that the role of the County Council should be better / more fully described as an enabler and a vehicle through which leadership would be delivered. Examples might be included.

I think there does need to be some level of detail or specificity. There is nothing to measure progress off. The public distrust of RCC is at a high, so they need to see clear committed actions and promises carried out.

The Vision claims: "Wherever new homes are needed, they will be built in a way that protects and enhances the things that matter most to everyone – Rutland's sense of community and its unique rural identity. New homes and developments will meet the highest possible environmental standards, as well as having a positive impact on wildlife and the local ecology. " This does not reflect the proposed developments either side of Braunston Road which detract from "the highest possible environmental standards" and your claim to "seize opportunities to create and develop wild areas which support greater biodiversity" and ignore the fact that "Our green and open spaces are a key contributor to mental wellbeing." I would also argue that "the things that matter most to everyone" includes having living space, which is denied those forced financially to live in tightly packed housing developments.

Much of the counties charm comes from the traditional buildings within the towns and villages. Modernisation of these buildings to meet carbon goals, in a way that does not detract and is sympathetic to their looks and feel, would be a fantastic opportunity to enhance the counties green credentials, and show case what is possible.

Some of the statements can be contradictory. For example, being so welcoming to all types of businesses/ industry may not always sit comfortably with preserving Rutland heritage. For example, how much mining do we want in the County?

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The draft places great emphasis on sustainability, but its only initiative in respect of this is thermally efficient houses. I believe that the location of new homes is equally important to achieve sustainability. New homes should be grouped in sustainable locations rather than scattered throughout the county. On locations which have or will warrant their own jobs, schools, shops and medical facilities should be permitted.

I would like to see more focus on fresh air and exercise with new addition extra footpaths for those who want to enjoy the country side but do not have horses, bikes or skate boards, those of the older generation that would just like to take a walk perhaps with the pet dog. Rutland lacks foot paths around between Ashwell and Exton.

Road planners need to review a number of junctions that cause tailbacks and car polluting the air whilst queuing. Simple modifications can save fuel, time and the environment. e.g. Where the A1 slip joints the Stamford to Oakham Road a small width change will free up the flow of traffic.

All that 'The Vision' aspires to is admirable, but no emphasis is laid on the vital need for this tiny county to protect its essentially rural nature by vigorously resisting the blandishments of developers and acquiescence of planners, who would ride roughshod over the wishes of residents. In recent years, we have, despite our pleas and protestations, seen ever more of our green and pleasant county disappear under bricks and mortar, on a number of notable occasions, such building being allowed even outside the earlier agreed boundaries for development. If this were allowed to continue, the aspirations expressed in 'The Vision' in regard to Rutland's many natural attributes could never be attained.: a perfect example of the goose and the golden egg.

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** No

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

(1 = no, not at all, 10 = yes, very much) 8

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

It is difficult to think of everything that should be in it without detail, but A notable omission is a specific mention of the urgent need to tackle environmental damage - in particular poor water quality - caused by industrial farming. Our agricultural heritage isn't all a good thing! Rather than things being missing, I think the emphasis is wrong. There is no sense of urgency and it is also far from 'bold'. In fact it comes across as somewhat low-key, complacent and twee. Two exceptions come to mind - the vision of a substantial improvement in sustainable travel in the County and also that "Rutland will fundamentally redefine its relationship with waste by reducing the amount that is consumed and thrown away. " Of course, the difficulty will be in the delivery of both those things - but excellent aspirations. It could be argued that everything else in the Vision should be happening anyway and therefore is not very 'visionary' - maybe just catching up.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

(1 = No, not at all, 10 = yes, very willing) 6

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The aspirations in the Vision are of course welcome. However, I have a suspicion that The Council is hoping to drive a large part of this forward merely by community and voluntary action. That is not really going to hack it. In order to do anything meaningful in a timescale that has any relevance, some hefty financial investment is going to be needed. Given that the current flavour of HM Government is not really very keen on Local Government funding, the Council should be thinking creatively about how to bring extra cash to bear on the problem. Maybe some EU grants. Oh no, wait....

Document is very disappointing. Generic bland waffle which could describe anywhere. I think this document could have been written before the consultation. Difficult to see how this lends any mandate at all to decision making.

The council tax in the county is one of the highest in the country. I would have liked to see at least a statement of an ambition to address this. Either reduce it or at least focus on obtaining value for money.

The villages to the north east of the county like Essendine and Ryhall are some considerable distance away from Oakham and Uppingham. We rely on Stamford where we have no say. We have to access the health services in Stamford which are terrible- ie Lakeside Stamford should be integrated into Stamford. Just in the last 2 weeks we learn we could have to accommodate the largest solar farm in the UK.

A clearer view on ownership of the vision to avoid it becoming a :council project. The need to establish clear performance indicators starting with a baseline where are we now . How can we begin to measure progress without this. 2026 isOK for major review but to far away if we are to make progress this is another project that could easily be put on a shelf

It gives a great ethos but not details. The council tax is extremely high here but what we get for that is far less than many other areas of the country. There is very little for children and even less for teenagers. There isnt even a cinema or public swimming pool. The town centre of Oakham has nothing much to offer - no Waitrose, no M&S (clothers or even foodhall). Nowhere to buy childrens clothes. These are just examples. Things could be a lot better.

A commitment from current Councillors that they will stop their ridiculous nimby approach to development and start thinking about all of Rutland. How can you be against development and then vote in favour of development in someone else's ward??

Homes are needed but areas of green, fields and trees need to be retained in vast quantities. Please don't destroy all the beautiful green areas and fields by piling on loads on homes. With the increase in population comes a need to increase the resources available to the people living in Rutland. Health care needs to be supported, it is already hard to get doctors appointments but with more people to support, this task becomes even harder. Increasing the services available at the local hospital in Oakham would help reduce the number of people needing to travel greater distances for health care support for less serious procedures/injuries. Investment in the high streets in the main towns. Don't let the towns become run down, incentivise businesses to start up and come to Rutland. With the closure of John Lewis in Peterborough which was the main and perhaps only main reason to go to the City, there are opportunities for new businesses to start up and fill that gap in the market. Competition remains on line, but there will always be people that are not willing to travel or want to see and feel products in person before making a purchase. Infrastructure. policing and opportunities for the children as they move through schooling and into their first jobs/FE or apprenticeships. People need to be encouraged to buy into the sense of community and to be proud of where they live, to respect the green areas. To be an ally in standing up for the right behaviours within the villages and towns. Better transport connections are needed to encourage people to move out into the villages, if they are to be less reliant on cars to get about day to day and into the evenings.

Q5. **Please use the space below to tell us what you think is missing.**

I recommend including the term / concept of circular economies in the section about consumption and waste - ensuring that 'waste' products and outputs from industry are captured and reused in creative ways. I also recommend that in the section on mental health, there is mention of education which supports people's wellness and holistic development. E.g. that schools and colleges provide learning and learning environments which support children's understanding of their own wellbeing, which they can then carry into their adult lives.

I think you have done a great job at looking towards the future in an inclusive way, thank you. If it's not too much, I would also recommend exploring the concept of alternative economic models as far as possible - exploring ways to support all local people within planetary boundaries. E.g. using Kate Raworth's Doughnut Economics model, trialling a sharing / gift economy, or a UBI. Finding ways to transition away from the 'growth at all costs' mindset which dominates our current economic model. Including community conversations / citizens assemblies to explore 'growth of what?' - what do we actually want more of in our community and how can we achieve that within planetary boundaries?

1. I live in Greetham. I realise you are not looking at specific issues in this "Vision" but surely things which are in DIRECT CONTRADICTION to the "Vision" should not now be set in motion. I refer to the quarry extension which is very likely to be permitted extremely close to houses and the Community Centre and which, if permitted, will continue to operate well into the years to which the "Vision" refers. Improved "Health and Well Being" are definitely not going to be part of Greetham's experience in the coming years if this is allowed to happen. 2. Otherwise, I am in agreement with The "Vision". I particularly like the emphasis on transport which I feel needs a lot of improvement in the County if we are to reduce car journeys and keep people connected in a sustainable way. 3. I would like to have seen more specific suggestions throughout the document. It is very aspirational but has the potential to be forgotten in the day to day business of coping with running the county. Overall, a very worthy document but rather idealistic and vague.

There is no mention of housing. This is a critical part of Rutland's future and its omission is surprising given the abandoned Local Plan. Rutland should be increasing its housing by no more than the national average increase needed to meet national governmental objectives

Rutland needs to drag itself out of the Stone Age, embrace change, modernise and keep up with other nearby towns such as Melton and Stamford. Rutland has a core group of people wearing rose tinted spectacles who do not want change and will continue to oversee Rutland's demise.

Additional emphasis on further environmental protection, including ample green spaces included with developments. A bit of grass isn't sufficient and should look to connect or provide stops between larger spaces. They should be for people and wildlife.

Transport and in particular the railway line through Oakham which currently brings the whole town to a standstill when the railway barriers come down for at least 20 minutes per hour. The lack of leisure facilities including swimming pools in the county. If Rutland wants to be an attractive county to young families then it needs a swimming pool

Housing - a lot of housing plans are currently at planning stage in Oakham but the affect of these on current travel difficulties through the market town don't seem to have been considered. Other services such as doctors need to be improved drastically before the county opens itself up to more housing availability. You can't even get through to a receptionist at the doctors when your child is ill.

I think mass development of housing is a big thing in which residents are very upset about, and which RCC has got very wrong. You talk about our wonderful rural county, but fail to realize you are eating up more and more green space, in order to fulfill your wishes of affordable housing and. As one of the smallest counties in UK, we cannot sustain the amount of housing which is being built, without the adequate infrastructure in place. I think in order to fulfill your plans for an ever increasing population in our county, you need to tackle things such as schools, doctors, social care first. Then I think residents will be more on board. And stop building on green field sites.

No clear strategy for keeping the young in Rutland. They need jobs and affordable housing in order to stay here. Building 4-5 bedroom 'Executive' homes merely feeds housing developers greed, and nodding through more supermarkets provides few new jobs and drives another nail into the coffin of small, independent retailers. Neither address the problem. If the Council does not get a grip of the situation soon, Rutland will become a dormitory for aged, retired people who will drain financial resources for their healthcare.

There is an emphasis on inclusion and of accessibility for all. Very sadly, we find this totally lacking particularly when a change of use on a building should trigger a necessity to amend access in an acceptable manner to a disabled user. This seems to be completely lacking in many commercial properties and the compliance with the Disability Discrimination Act is very poor. 'Where reasonable' appears to mean very little is compliant, making it difficult/impossible for a wheelchair user to access.

The vision was lovely but truly said nothing. What are the core values underpinning the vision to help guide decisions in every department of the council? Rutland is an extremely wealthy county (the residents are) but we have people in poverty and little evidence of support for asylum seekers. How does Rutland square this circle. How can Rutland engage with the 2 public schools so they contribute more realistically to the lives of the children in Rutland, as well as the rich children from around the world. What should these privileged communities be putting back into Rutland.

Rutland doesn't need updating or does it need to change, it's a rural idyll that's the point, if people want busy life's eateries and hustle bustle than live in the city, there's two perfectly noisy smelly trashed cities either side of Rutland, why hanker for peace and quiet and then complain about the church bells ringing, except Rutland for what it is and stop trying to overdevelop it.

Not sure how , but the future of North Luffenham base is the 'spectre at the feast' . The vision refers to the 'market towns' and the hole balance will be changed by a third 'town'. I know it's not meant to be specific, but it's hard to see how the new development will fit in with this view

I feel that Oakham Town Centre needs to be more pedestrian friendly. Many of the pavements are too narrow for people to pass without stepping into the main road, especially if there are prams or mobility scooters. Also, there are many parts of town where crossing the roads or treacherous, uneven paving not suited for wheels, etc etc. It needs some major replanning and traffic reduction initiatives. Arts and culture so not get enough attention in the county. Much of this is left to local business and the schools to create. The concerts in Cutts Close through the summer are great but there needs to be a community hub for more regular all year round activities of this nature. The Victoria Hall would be perfect given some investment.

The plan talks about Leisure and recreation creating opportunities to have fun and socialise yet one of the very popular Leisure facilities for many is no longer possible as we are now the only County without a public swimming pool. For a lot of people swimming is a great way to keep fit as it puts a lot less pressure on the joints with the water helping to support you yet we now do not have that option.

I do think we need more balance between council taxpayers (its very high) and visitors who use services they do not contribute to even if they contribute to private businesses. New housing may well help spread the burden of that council tax but will also add pressure on services.

Excellent GP services immediately. This is seriously and dangerously lacking in Oakham. The practice does not meet the needs of the patients. I do not know about the rest of Rutland. I have never known a situation like this at any time in my long life in many other parts of UK.

No mention of the St Georges Barracks development which will completely ruin the County. There is no need for a development of this size especially as RCC is already giving land to South Kesteven for their housing needs. The area should either be a country park (not use Burley Woods for a wildlife park) or a site for a new hospital so that we do not have to go to Leicester or Peterborough for our needs. My priority would be for a hospital as the NHS is always chronically short of beds.

The skeleton in the cupboard has not been mentioned. The possibility of a monstrous new town at St George's Barracks is a tremendous black cloud hanging over all of Rutland's residents. This is not required under Rutland's housing needs, and because of the lack of employment it will just become a drab commuter town. However worst of all, it will spoil all of the culture, wildlife and character that has been written about in your Vision document. It is almost as if someone wanted to cause maximum destruction to such a lovely county. Worst of all, your dedicated residents, who contributed to your vision will become so despondent if SGB proceeds, that they will move away in droves.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? (1 = No, not at all, 10 = yes, very willing) 8

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The feedback is very Oakham/Uppingham centric. I suppose this is due to higher numbers of residents in those two main towns. Although important to residents, there seems to be more interest in current facilities/resources rather than longer term vision and retention of the beauty, culture, heritage and scenery of the county. There is little discussion about how we could contribute towards the massive effects of climate change. Given Rutland has one of the lowest number of trees per hectare in the UK, then SGB site would be a wonderful climate project to showcase to the rest of the UK. It would match our reputation in protecting wildlife and promoting rural and leisure tourism. It would also prevent a concrete nightmare with huge traffic congestion from destroying the eastern side of our wonderful county!

The vision includes excellent comments on Rutland striving to be carbon neutral and ensuring that homes are designed with the latest zero carbon technologies in mind. The point about co-operating with neighbouring authorities to tackle big issues is also key. I look forward to seeing the vision being reflected in planning decisions.

Substance. The Vision is just that - a Vision. It has no timeline and lacks sufficient detail to be of use. It is also inconsistent in that it talks of Market Towns and yet encourages development of supermarkets and outlets which are not representative of a market town - Oakham has Aldi, Tesco, LIDL, Co-Op etc. Indeed, an application for H24 services near Uppingham was supported by Rutland Planning but thankfully overturned. It talks of integrated transport system but this is not within ability of Rutland Council to deliver - it does not own the train operators.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

There is no detail of what achieving this vision will cost. People of Rutland already pay higher rates of Council Tax than neighbouring counties and without many of the benefits.

You couldn't disagree with the vision. What matters is taking the vision into reality. Also a 50 year view is absurd to achieve this (if that's what 50 year vision meant). 10 years is more realistic. 2 key areas currently to implement this vision are St George's Barracks development and the Rutland Health and Wellbeing strategy.

Q5. **Please use the space below to tell us what you think is missing.**

Nowhere does the plan state what the vast majority of established Rutlanders think which is that Rutland must strongly resist to any further major housing or industry. That will blow this whole vision apart. The housing estates that have been and continue to be built to Planners' authority are a disaster as it is. To increase this would be destruction of all that the vision holds. County, rural, tradition, beauty, welfare, transport, leisure, tourism.....the list goes on. Oakham has already been effectively ruined by the Barleythorpe monstrosity, both housing and industry, and to go on without any thought to sustainability or vital infrastructure is a measure of just how mad further expansion would be.

No mention of protecting rural spaces from human invasion. A group of people can quickly destroy a rural habitat which has taken over 100 years to develop that way. A lot more should be taken into consideration before people are encouraged into rural spaces.

Avoiding a massive solar farm that is going to obliterate numerous footpaths and bridleways. Solar farms are fine but there is no need to make the massive reduction in amenity that building something 10 times larger than the current largest in the UK.

The vision aims for Rutland to be recognised as 'a great day out', however Discover Rutland's vision is to encourage people to stay longer, as the secondary spend would increase and the area is already busy with day-trippers. We suggest a change to; "Rutland will also build on its reputation as somewhere for a perfect break by unlocking the potential of being a well placed, key destination in the East Midlands for leisure, sport and cultural activities." The data is also missing information about visitor number - instead of 'many thousands of people...' we suggest saying 'over 1.8 million people who visit the county every year.' as taken from our STEAM results.

Purpose built education facilities for 6th and 7 form pupils, on-site swimming pool with shared facilities for the residents of Rutland or Leisure Centre with swimming pool, ice-skating, bowling, cinemas gyms etc and a footpath from Market Overton to Cottesmore!!! So many people walk along the roadside and risk their lives. The many children of Barrow can't even walk to either of the village shops in safety..

Timescales - the vision is not a plan... understood. However the present document reads like an advert for Cadburys Caramel. https://www.youtube.com/watch?v=dvkexGUF79A&ab_channel=PlayfurCinema. Not quite real very fluffy and certainly forgets the actual realities. Medical Care, Housing, RCC Management profile, Political furore etc

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

Having spent some years and at many times full time working on an Advisory Committee on behalf of our local community I have some concern about ever getting involved again. That committee (SGB Advisory Group) was shut down without any compunction or notice when certain RCC related individuals (Paid Staff and Ward Members) did not like what they heard. The failure to listen at that time was much the cause of the process undertaken now; for which the whole county should be grateful for. There is a continuing shift in attitudes within the county and perhaps some of the arrogance and bullying that prevailed is now on the wane. I very much hope so as the advice at the start of the SGB and local plan debacle was to stop, consult and reassess the community attitudes. This was not done and look what happened. I was interviewed on this at the time by the annual audit team and in part contributed to the recommendation to RCC to improve their community consultations. I have said enough....

There is no target as to when Rutland aims to be carbon neutral. The vision puts responsibility on individuals to solve the climate crisis by saying that 'people will have easy access to information and support they need to decarbonise'. People already have easy access to this information. But what do you expect someone who only just manages to pay for food to do with that information. You mention support. What kind of support? For a council generated vision, it is incredible that there is no mention of local government actively supporting people to become more sustainable. The word 'climate' does not even appear once. Given that the climate emergency is an existential threat to mankind as we know it, that has to be dealt with immediately, it's strange that this is not even mentioned. Nor is resilience to climate change. I understand that some people said they didn't believe that climate change was real in the consultation. But some people believe the earth is flat. Do we stop all global shipping because the ships might fall off the edge? Clearly not. So why have these people been allowed to influence such an important document? I know the council cannot achieve everything alone. But setting out a vision that puts the emphasis on individuals to decarbonise magically with information is an abrogation of responsibility. The fact is that other budgets must be cut to pay for any meaningful local government support in the immediate future. And nobody has the guts to tell people that their bins can't be collected as regularly or that the roads budget will be diverted to away from cars to help cyclists instead.

Take action or get voted out. It doesn't take that many votes in a local election. Enough words already. Blah blah blah.

Q1. **Did you take part in the Future Rutland Conversation earlier this year?** Yes

Q2. **Do you own or operate a local business?** No

Q3. **The Draft Vision describes the kind of place that local people have said they want Rutland to be in the future. Is this the kind of place where you would like to live?**

(1 = no, not at all, 10 = yes, very much) 8

Q4. **The Draft Vision is not meant to be a detailed plan. It sets out big, long-term goals for Rutland, based on the things local people have said really matter to them. We need to keep talking and working together to decide how best to achieve these goals. Is there anything that you think is missing from the Vision which should be included?** Yes

Q5. **Please use the space below to tell us what you think is missing.**

There should be more detail of the aspirations and long-term goals, to include appropriate reference to the inevitable changes in the context in which the county must operate and which are outwith the control or influence of the authorities in the county. This would cover, amongst other things, environmental evolution and pressures, advances in technology such as in communications, in agriculture and in electric and autonomous transport, demographic moves and developments in neighbouring regions. There is fairly comprehensive coverage of what residents, etc. have said they would like, perhaps much as would the residents of any other, similar rural community, but surely there are opportunities not just to keep Rutland special, but to make it even more so, through innovation, coherent plans and policies, and, perhaps most important of all, strong leadership both from the Council and from relevant businesses and voluntary organisations.

Q6. **Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.**

(1 = No, not at all, 10 = yes, very willing) 7

Q7. **Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:**

The Vision must be a living document, responding when necessary to developments as they arise. It must also provide a sound basis for county-wide plans going forward in a fully coherent way. There is therefore a need for some sort of oversight, perhaps a board made up from the Council, businesses and the voluntary sector, with the power to recommend action to assure such coherence and also to update the Vision when required.

The climate crisis requires immediate action now if we are to reach net zero by 2050 the next ten years are critical to get at least half way to carbon reductions. The Vision states generalities in its goals which is a start but it really needs to set out a clear plan and programme of initiatives now if you are serious in meeting the carbon reduction objectives. The vision of Rutland in 20 -30 years time will not be achieved if action is not ramped up immediately to reduce the impact of climate change, Failure on this one issue will mean the County will in no way achieve the vision outlined. The irony is that your last page of the vision (page 11) says it all in the apparent lack of realisation of what we are faced with, the image shows the largest polluter and contributor to global warming in the County, Ketton cement works and the River Welland part of the counties seriously polluted river system, The Climate Change Summit heard from the Welland River Trust that 25% of Rutland's rivers were rated BAD whereas across the country the figure is 3% BAD, with only one stream rated good. The parish of Wing is bounded north and south by the River Chater and its southern tributary both are classed as BAD. The reasons being sewage discharge and bad farming practice. If the county is to become a leader and innovator in the fight to tackle the climate crisis it has a great deal to do and a five yearly review will in no way set the agenda for the urgency in these matters. Carbon neutrality, environmental sustainability and accessible and sustainable public transport are mentioned in the Draft Vision and are of key importance. The recently withdrawn Local Plan however indicated that round 40% of working residents commute out of the County, probably mainly by car. It is of therefore of critical importance (in the interests of carbon neutrality and long-term environmental sustainability) that the development of new housing in Rutland should not be out of proportion to the number of available local jobs. If this rule is not adhered to, more out of County commuting will happen with unwelcome adverse effects on carbon neutrality and to the detriment of Rutland's rural nature. This should be stated clearly in the final version of the Future Rutland Vision.

P5. Charges for parking at Rutland Water are too high and discourage visitors. P7. Oakham Surgery needs to be more user friendly. P8. Links with Stamford should be encouraged in particular for a revision of the Parliamentary Constituency. Oakham bypass needs signs indicating excess speed to the drivers.

I agree that there needs to be better public transport for non drivers, including links to railways. We need to encourage our young families to stay in the county to keep communities and schools viable. So affordable housing, both owned and rented is essential, and local employment. Attracting more businesses may involve improving road links, unless rail freight becomes more common. All new building should be future proofed by meeting high standards of construction and insulation. Refuse collection should include waste food, to dispose of food not suitable for domestic composting.

Q5. Please use the space below to tell us what you think is missing.

TRUST - There is much in the Vision I applaud and rightly so it acknowledges that by working together Rutland can be a great county, however there is nothing about the need to develop trust between the council and communities, and, the importance of engagement. Communities need to have trust in the actions of decision makers and this will only come about if engagement/consultation between the council and communities is based on meaningful, realistic and open discussions between all parties. Open and transparent dialogue and good quality engagement and consultation is needed across all aspects of the councils work and should be part of this aspirational plan for the county. The vision needs to acknowledge this and guide this change. Further information is also needed within the vision on how the council will manage the expectations of residents who are looking for its ambitious targets to be met especially if budgets are reduced. This will also help to rebuild trust which has previously been lost. DIGITAL DIVIDE – For communities in Rutland to become truly connected, the council and all other organisations will need to overcome the digital divide which existing across the county. Social media platforms such as Facebook may be widely used by some, however it is not predominately used by the older generation. The vision needs to acknowledge and address this to ensure no one is marginalised as Rutland moves towards becoming a modern rural county. PROVISION FOR THE ELDERLY – The housing needs of young families is widely accepted as being an important issue for the county however the housing needs of the elderly is often overlooked. If Rutland is to become a place to live your best life, Rutland will need to address the lack of provision for the elderly which exists in most communities. In the same way that all new development needs to provide affordable housing, builders need to provide a percentage of suitable homes for elderly people which allows them to live independently for as long as they can and wish. Currently many elderly people need to move away from the village and community which has been their home for many years in order to continue to live safely in a manageable sized home. This is far from ideal and if Rutland is to become a county which cares for all age groups, we need to address this and strive for independent living provision in every village across Rutland. The bungalow complex at Cater Mews Ketton is a great example of suitable sized properties for the elderly within a safe but connected part of the village. GOVERNANCE- I would also like to see some clarity in the vision as to where it sits within Rutland's policy framework. Article 4 of the Constitution may need to be changed to reinforce this and provide greater clarity. Communities, parish councils and all organisations within Rutland also need to understand from the outset whether or not adoption of the Vision will be a council or cabinet responsibility, and very importantly, from the outset we need to know and understand whether or not any proposed changes to the vision will be subject to public consultation, or, will it be possible for the chief executive/cabinet to make changes to the vision without public consultation?

Q6. Rutland County Council has organised the Future Rutland Conversation but it cannot achieve all the goals in the Vision alone. Other organisations and local communities also have a big role to play. Would you be willing to get involved in community projects that help to achieve some of the goals in the Vision? E.g. projects linked to the environment.

Having invested a great deal of time and money developing a Future Rutland Vision, the council will need to make the most of its unique position by placing the vision at the heart of all long-term plans and policies, however I am not sure how will the council will ensure the vision is central to every plan and big decisions and is not forgotten. The current corporate plan is a great example of how the current system failed. The plan was written with no regard to the 20-year vision and was not even acknowledged. This shortcoming within the system needs to be considered to ensure it is not repeated.

I am very pleased to see that sustainable residential and commercial development has been highlighted within the plan. We are a small county and have the opportunity to send a big message to the rest of the country that we will not tolerate outdated building intentions, regulations and practices. The future is dependant on our ability to co-exist in harmony with nature rather than try to control it. Thank you for valuing this is the plan. I hope that this will extend to social sustainability, ensuring that development takes into account the need for residents to not only live in Rutland but also work, have access to education and healthcare here within the county.

I realise this is a vision and a very good one however I have real doubts that we have the local politicians with the ability to deliver it. To take the saga of St George's barracks as an example, the development which was proposed couldn't possibly be considered at the same time as supporting this new vision. Yet a large number of councillors did support the SGB development, largely because they believed it would avoid development in their part of Rutland. I also fear too many people oppose any change, which would lead to the area stagnating if we are not careful. SGB was a ridiculous plan however we should be embracing the benefits technology can bring to ensure Rutland remains/becomes a vibrant, modern, rural county, not a museum.

I would seek to add, in the section on development, that any building of new homes will have regard to the need to make it easier for the younger generation to remain in the county - e.g. through the provision of affordable homes / shared ownership schemes.

Having read "Future Rutland Vision" the authors could do with leaving the fantasmagorical land they live in and get real. It is bunkum, bosh and balderdash. I've never read anything so unrealistic about anywhere except Narnia. RUTLAND NEEDS more DOCTORS' SURGERIES, A MANNED POLICE STATION, MORE SCHOOLS, A HOSPITAL (nearest are a 60 mile round trip away). Rutland is filling up with mass housing (people) who have to drive to their place of work or a mainline railway station (carbon generating), no REAL BUSINESS to employ substantial amounts of people to prevent the long commutes. Fast food drive throughs, cafts and hairdressers slide through the planning system ad nauseum.

I think it is a positive and very ambitious vision, which it should be! Large businesses must show what extra they will invest to help achieve this vision if they are looking to set up in Rutland, not just their standard things. I believe our council tax is already one of the most expensive per head in the UK so we have to push harder with large & developing businesses & government funding sources to help pay for these great plans. E.G In addition to reducing packaging, all the supermarkets & white goods shops etc, should provide better & convenient facilities to collect unrecyclable packaging & pay more towards the cost currently incurred in removing this waste.

No mention of St George's Barracks. Clearly something needs to be done there but plans today are simpler turning it into a mammoth housing estate which does not reflect that we are in a village and rural area (Edith Weston/North Luffenham) and it must be in keeping with the local community and the wonderful Rutland Water. It is currently an eyesore and spoils the image of Rutland. Re 6 below, would be willing to join in relating to St George's Barracks.

As this is "rural county", housing should not only be "well-designed" (p4) but also take note of the local vernacular. Most of the groups of houses built in the last few years are, sadly, identical with those in Northampton, Southampton and every other city in the UK.

Again, on housing: it would be easy to lose the "rural charm" often mentioned in this document by building large numbers of look-alike houses on fields on the edge of our villages. I'd like to challenge the planners to do something different: modern houses (not just pretend Victorian or Edwardian houses, with an individual feel, and using local materials. Start with the feel and look of the town or village, and work outwards from there. Uppingham, and in particular Oakham, are already losing their market-town feel.

Need priorities - activities for young people, improve health access esp GP's at Oakham - ensure Memorial Hospital stays open - a big asset and access to Melton Hospital and its facilities to reduce travel to Leicester. Improve cycle lanes, have central point for info re activities/markets/gigs etc etc. By law soon new build will have to have solar panels/heat source pumps etc and you need to enforce that sort of thing. Terrifying that some commentators say no such thing as climate crisis! Have 'buy local' campaigns. Encourage shops to open in Oakham by reducing business rates for new occupants and heavily taxing landlords who keep them empty. Keep developments appropriate for surroundings and on brownfield sites. Waste food collection wd be good. (Bins collectors excellent) Catmose gym was filthy and music much too loud (wouldn't turn it down even when asked) so have stopped going. For info your links at end of each doc - 'click here to comment' don't work.

A commitment not to build on green-field spaces in Uppingham or Oakham and instead use the brown-field site of St George's Barracks development to build the third market town of Rutland . This should not prevent small building projects in Uppingham, Oakham or the surrounding villages but enhance (not destroy) what we already have in our county. Surely we can address the shortage of housing by creating a third market town which will not destroy what we hold dear (our green and open fields and spaces) and create another market town (again surrounded by green and open fields and spaces) for everyone to enjoy.

Should be more concentration on tackling climate change and pollution through connecting transport using cleaner energy, dealing with vehicles and pollution near schools, using green hydrogen, rewilding connected natural corridors, planting more native trees and hedges, perhaps more wetlands. Housing should be dictated by "need".

It talks about leisure & recreation, but Rutland is the only county in England without a Public swimming pool. No mention of Greenfield vs Brownfield development, multiple green areas in Oakham have been given over for development, changing the character of the local areas, yet the council rejected development on the brown field site of St Georges Barracks.

I realise this is not a detailed plan. Most people would agree with all of its aspirations, but it is very general and lacks any targets at all. For example 'Rutland will strive to become a carbon neutral county...' (whatever that means) could have been replaced by 'Rutland will aim to become a carbon neutral county by 2050' (would need further qualification, e.g. to Scope 2, but at least it puts some sort of marker down). Similarly, it's hard to see what is going to actually happen with transport. In other words some more concrete, albeit long term general, targets rather than just vague and often, in reality, unachievable aspirations.

With 2 public schools in the county, that aspect of education is well cared for. However us lesser mortals need 1) a swimming pool, 2) better access to Corby and Kettering via an improved rail link, 3) access to Rutland Water should be free to Rutland ratepayers, 4) improve education at village and upper school level, 5) Improve main roads to encourage HGV's and the like to use them instead of the small backlanes that are suffering as a result

A SPECIAL PLACE - Rutland should not allow unrestricted development or give its housing allocations to other Counties. Affordable Housing implies sufficient jobs for those residents. Rutland is not an unskilled, low wage County and therefore an over importance on affordable houses will lead to an explosion of Council assistance and care services which has not been budgeted for. TRANSPORTATION - Rutland does not have the infrastructure to drive people away from their own transport NOR the population demographic that would wish to use it. It's time Rutland woke up to this fact. Rutland current population is probably the right size for the County and the mad drive to increase it will only put a much bigger burden on the current residents, it will probably drive away a lot of the current residents who came to the Rutland they liked and not the new Rutland expansion plans deliver. HEALTH CARE - Rutland needs to utilize the the Oakham Hospital with the co-operation of its Rural Doctors to be a first port of call for ALL health issues, with a streamlined transfer to specialist units ANYWHERE in the UK.

I think the response from the villages has been poor, somehow we need to encourage further input from the villages rather than have an Oakham bias.

We need to try and get more involvement from the villages that seem not have been so involved looking at the data. Keeping the integrity of what we have in Rutland is precious and we should not lose sight of this with possible future developments that are really not in keeping with present infrastructure or what Rutland needs.

(1 = No, not at all, 10 = yes, very willing) 9

Q7. Please use the space below to share any other comments or feedback about the Draft Future Rutland Vision:

The Draft Vision describes a halcyon place where life is wonderful, and the sun shines every day. Who would not tick the “10” box? Of course, being a Vision, it does not have to say ‘how’ or ‘when’, and indeed on the first page reduces expectations: “This Vision is not meant to be a detailed plan”...“it won’t become a reality overnight”. Such governmental consultations whether at National or Local level have a long history of just being used to ‘confirm’ what the organisation was going to do anyway. My overall concern is that the ‘tick box’ surveys used here and in previous stages of the FRC limit the choice of responses, and their outcome relies heavily on interpretation. Just one example is the FRC Summary Report on Climate change and the environment. The Draft Vision Document only mentions the word ‘climate’ twice, in the context of impressive claims of ‘leadership’ and ‘awareness’. I do not believe that RCC even begin to understand what that means. The FRC ‘Summary Report on Climate change and the environment’ certainly does not give any encouragement that they do. The green summary box on ‘climate change’ gives unusual prominence to the minority who do not believe climate change exists. It also apparently ignores the result of the survey (Figure 5) that showed the number one concern in FRC survey on this issue is ‘Global Warming’. Section 6 of the same document asked: ‘What does a sustainable Rutland look like?’ The top answer was ‘Increased used of sustainable transport (electric vehicles, cycling, walking etc.)’ Yet ‘electric vehicles’ are not mentioned at all in the Draft Vision! I fully endorse the move to encourage more cycling and walking, but it would be naïve in the extreme to imagine that this will reduce car journeys by more than about 20%. Everything from shopping, to longer commutes to the visitors on which Rutland’s economy depends will continue to be done by car. New electric vehicles (EV) already outsell new Diesel vehicles. The number of EVs on the road in the UK is doubling every 18 months. Currently 1 in 40 of the vehicles on the road are electric vehicles, this is forecast to rise to 1 in 10 by 2025 and 1 in 3 by 2030. They have to be catered for. I remain enormously impressed with the concept of the Future Rutland Conversation, but the opinions of the inhabitants of Rutland cannot override the science. With regard to climate change, since August 2021, when the Intergovernmental Panel on Climate Change (IPCC) produced their 6th annual report for governments around the world, the facts have been clear. Here are just three statements from this huge report: 1. “It is unequivocal that human influence has warmed the atmosphere, ocean and land. Widespread and rapid changes in the atmosphere, ocean, cryosphere and biosphere have occurred”. 2. “Human-induced climate change is already affecting many weather and climate extremes in every region across the globe”. 3. “Limiting human-induced global warming to a specific level requires limiting cumulative CO2 emissions, reaching at least net zero CO2”. These are the facts, and they should be reflected in the Draft Vision, rather than the ‘opinion’ of those who do not believe climate change exists. The government’s robust attitude to the climate crisis is beginning to be reflected in new legislation, most of which has appeared since the FRC Summary Reports were issued in July: NPPF21: 2021 Update of Part L and Part F Net Zero – Build Back Greener (net zero by 2050) Consultation Response: EV Charge points in Residential and Non-residential Buildings which will result in legislation in 2022 for EV charging points to be fitted in all new homes. The RFC Draft Vision needs to reflect both the science and the new and impending legislation which it will need to enact. If, as I suspect, this ‘Draft’ Vision becomes the ‘Final’ Vision, then you need to make sure that when the Vision is turned into a reality (which may not be at all like it), that you use the science to guide the ‘leadership’ and ‘awareness’ that you claim will be driving the process.

NS bypass (1963) 1970 is vital to Uppingham prosperity. When I bought my property in 1970, plans were sufficiently advanced for searches to be made about disadvantage to the west of my home to cause concern. We are still waiting over 50 years later. Uppingham will never reach it's potential prosperity whilst constant heavy traffic thunders through the centre of the town. A north/south bybass is essential!

My top priority is a bypass. My second priority is to preserve the A47 as the top limit to all buildings to prevent creep to the north. I was on the first town planning committee and we all believed that this should be so.

"Growth in Rutland will be sustainable and preserve the county's quintessential character" "Rutland will be a place where the natural environment and heritage are cherished and enhanced" "Drawing on all of its unique qualities and attributes, Rutland should capitalise on its location and natural assets to become a leading example of a modern rural county" "Rutland: A modern rural county with an unrivalled quality and pace of life. Somewhere different and special, where you can escape from the norm. A place to connect with nature" "A friendly and welcoming county with incredible food, drink and heritage" "A genuine surprise where countryside and traditional market towns are complemented by technological advancement and innovations" "A county for everyone and a place to live your best life" The phrases above, taken from the County Council's 'Rutland, a special place' describe the county as I have known it and hope to keep it. There is room for improvement, particularly with public transport. My real concern is that unless we can ensure that we do not have to develop a 'Garden Village' larger than any present development, other than Oakham then we will not be able to achieve our aim of a future, improved Rutland. The whole character of the area will be lost.
